

EMERGENCY PREPAREDNESS COMMAND & CONTROL TRAINING

Fire-Aid International can provide a range of On Board Emergency Preparedness training and Port State Control Inspection Preparation to suit the individual requirements of your vessel and crew.

Emergency Preparedness training includes:

- Fire Fighting
- Abandon Ship
- Pollution Control
- Ship Security (ISPS)
- Command & Control
- Collisions
- Grounding
- Safety systems and solutions

Bespoke Training

Our expert instructors will assess the individual needs of your vessel and crew to design a bespoke training program.

On Board

Our instructors will carry out training on board your vessel working with the crew in their environment to deliver the highest standards and most realistic training results possible.

Cost Saving

As the training can be taken to your vessel this will dramatically reduce the cost of getting the crew trained at an outside training facility.

Prevention Is Better than Cure

Why risk the safety of the crew and vessel or the costly expense of a possible port state detention?

Contact Fire-Aid International to discuss your company's individual training requirements and have piece of mind knowing that we have taken care of your emergency preparedness.
